

XACT PRECISION LUBRICATION

XACT LINK SERIES systems are designed to provide precision lubrication to effectively increase food-processing equipment life and efficiency.

Applications:

- ◆ Overhead chain & trolleys
- ◆ Conveyor chains
- ◆ Oven/bakery chains

System Benefits:

- ◆ Precision wear-point lubrication
- ◆ Lubrication consistency
- ◆ Anti-corrosion line coating
- ◆ Automatic line-speed calibration
- ◆ High & low temperature options for chain lubrication

Features:

- ◆ Stainless steel enclosure, nozzles & reservoir
- ◆ System indication LEDs
- ◆ Custom-programmed controls
- ◆ Optical laser line sensor(s)
- ◆ Stand-alone or integrated capability
- ◆ High-pressure abrasion-resistant poly tubing

XCESSIBLE LUBRICATOR

*New and Improved Generation 2.0 Drive
For Xcessible Single Point Lubricators*

Performance Upgrades:

- LCD display controls
- Additional time settings
- LED light sequence
- Battery fault detection

LUBE-GUARD

Lubricant Safe Storage & Transfer

Tote-A-Lube

Color-Coded Oil Safe Containers

Lube-Guard is designed to provide your facility with a lubrication program that best suits your needs. From lubricant transfer to point-of-lubrication identification, the Lube-Guard program ensures that the **right** lubricant is applied to the **right** equipment.

ADDITIONAL LUBRICATION SYSTEMS:

Custom Designed for Specific Needs

- Parallel Chain Oiler
- Spray Bar System
