

Industrial press fitting solutions for clean controlled installations

Do more with Viega press fitting solutions for hundreds of applications. Make the same press connections for copper, stainless and black iron, along with easy-to-install transition fittings.

Only Viega can provide all of your system installation needs. Viega connections can be made in seconds, wet or dry, so lengthy shutdowns become a thing of the past and system maintenance and repair is easier than ever. Whatever your industrial installation needs, Viega has the answers.

- Only Viega offers the patented Smart Connect® feature to identify unpressed connections
- More than 1,400 fitting choices in copper, stainless and carbon steel
- Viega ProPress® and Viega MegaPress® fittings have been tested to the strictest standards in North America
- Viega MegaPress, the only carbon steel press solution for water and gas
- No flame is required to install Viega products, eliminating noxious fumes, hot work permits and fire watches
