

**With 99.53% on-time delivery,  
we keep lines running.**

### Flat-Flex® Conveyor Belt

- The largest open area available, up to 86%!
- Efficient in cooling, coating, draining, heating and drying applications
- USDA Accepted – no hidden areas make Flat-Flex® belts easier to clean
- Very low belt mass – reduced power consumption for lower operation costs

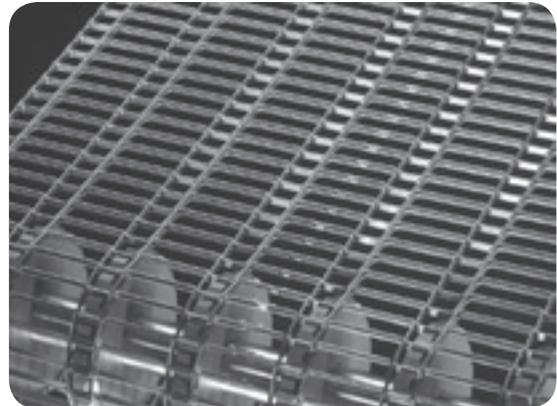

### Compact Grid™ Conveyor Belt

- Engineered to handle smaller products
- Light weight, open-mesh design
- Positive drive design eliminates heavy, expensive chain edged conveyor belts
- Simplified joining operation speeds installation and replacement, thus saving time and money

### Patented C-CureEdge® Edge loops

- Eliminates belt tangling
- Minimizes risk of accidents from sharp open ends
- Lessens opportunity for conveyor-to-conveyor catching and tangling during transfers
- Available for most Flat-Flex style belts
- Works great with our EZSplice® belt joining system

### Versa-Link™ Conveyor Belt

- Links in as little as 30 seconds!
- Forged Edge Technology™ prevents the outside edge of the belt from having catch points
- USDA Accepted – clean in place, for easy maintenance
- Most durable belt in its class which means longer belt life and lower total cost of ownership
