

# LOTENSION SPIRAL CONVEYOR BELTS

## METAL OR PLASTIC

Get The Best Performing Conveyor Belt For Your Specific Requirements

### Omni-Pro® .75, 1, 1.2, & 1.5-inch pitch

The strongest and most reliable spiral belts in their class

- Spiral tension rating up to 400 lb for 100,000 cycles
- Patented assembly, featuring Zero-Tension 360° Buttonless Welds, increases load bearing capacity and is easy to clean
- Patented "protrusion leg" decreases cage wear and eliminates weld abrasion
- Coining process prevents run-in wear and increases belt life

### Advantage™ 1.2 & 2-inch pitch

The only spiral belt that is USDA accepted for meat and poultry

- ETL proven to have the greatest airflow for the shortest dwell times
- Highest beam strength in their class – guaranteed not to sag
- Excellent product release and easy to clean
- Quick no-weld repairs
- Guaranteed no black speck

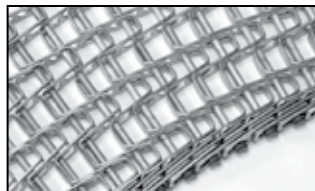

### LOTENSION SPIRAL FLEX BELT

#### New Omni-Flex® 3 x 1

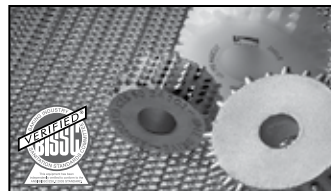

Precision crafted, this strong and lightweight belt is ideal for conveying trays and large products

#### Omni-Flex®

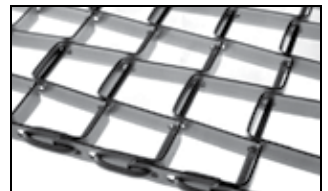

The first and most widely used Ashworth belt for spirals and turn-curves since its inception in 1959

### STRAIGHT RUNNING BELTS

#### Cleatrac®

Tightest product transfers in the industry, true tracking and very durable

#### Flat Wire

Proven reliability and easy to clean with numerous configurations for a wide range of applications

Ashworth Bros., Inc. is the world's only conveyor belt manufacturer that provides both metal and plastic spiral belting along with a variety of straight running belts offering customers the best belting solutions for their specific requirements. Companies around the world depend on Ashworth's quality products, reliable service, and innovative solutions to maximize throughput and minimize life-cycle costs.
