

# Beyond the Average Automation System

When your automation needs go beyond the everyday, look to the iQ-R Series of automation controllers from Mitsubishi Electric.

iQ-R Series is engineered to deliver connectivity to enterprise systems and other devices, includes built-in diagnostics to improve maintenance cycles, provides security features that protect your investment in today's world, and is designed for incredible speed and reliability to ensure high levels of productivity.

The iQ-R Series controllers are up to the challenge of your manufacturing needs.
