SUMMIT[®]
INDUSTRIAL PRODUCTS

Human health and personal safety are important issues in the food processing and packaging industry. Equipment leaks are going to occur, so the challenge is to select the right lubricants to minimize product contamination. Summit food grade lubricants have been developed, tested, and industry accepted to be safe, and reliable, while enhancing equipment performance. They meet the highest requirements in terms of hygiene and cleanliness.

Summit food grade lubricants provide maximum lubricant performance under normal operating conditions and manufacturing processes in the food industry. They resist degradation from food components, chemicals, water and steam. They are compatible with paints, plastics, rubber and sealing materials. Summit lubricants protect your equipment against wear, friction, rust, corrosion, while dissipating heat and saving energy.
