

SANITARY SOLUTIONS^{INC.}

Bulldog Fittings/Valves...Bulldog Tough.

We are your choice for sanitary fittings, tubing, valves and accessories with (7) seven warehouses in one location in West Columbia, South Carolina to service and ship your product COMPLETE the day you place the order.

Clamp Fittings & Gaskets:

Clamp Fittings are used to assemble or break down lines for cleaning in place or fixing and maintain Hygienic lines. We stock a full line of ½" – 10" sizes in T304 and T316L alloys that meet the 3-A requirements. Sanitary clamp neutered connections provide a leak tight connection when used with a gasket. Go to www.sanitarysolutionsinc.com and click fittings/sanitary clamp fittings for a "live" look.

Bevel Seat/John Perry Fittings & Gaskets:

Sanitary Acme Threads provide an easy assembly and safe cleaning of lines. Bevel seat fittings consist of a plain ferrule mated to a threaded ferrules and joined with a hex nut to form a union. When viewing the John Perry Ferrule, notice the "flat face" on this ferrule versus the bevel style. We stock a full line of 1" – 4" bevel seat fittings and gaskets in T304 that meet 3-A. Go to www.sanitarysolutionsinc.com and click fittings/bevel seat fittings for a "live" look.

I-Line/Q-Line Fittings & Gaskets:

I-Line/Q-Line Fittings are male and female interlocking with a gasket and clamp to provide an easy assembly/leak tight connection. They are found in areas that have high pressures and high temperatures in the line or a heavy vibration. We stock a full line of 1" – 8" sizes in T304 and T316L alloys that meet the 3-A requirements. Go to www.sanitarysolutionsinc.com and click fittings/sanitary I-Line fittings for a "live" look.

Sanitary Butt Weld Fittings:

Sanitary Butt Weld Fittings are found where a permanent sanitary application is needed and areas that do not require breakdown for cleaning or servicing. Each weld fitting has the size, alloy, and heat number for full traceability. We stock a full line of ½" – 10" sizes in T304 and T316L alloys that meet the 3-A requirements.

Schedule 5, 10, 40 Pipe to Tube Fittings:

Do you need a transitional fitting going from pipe to tube? We stock 1" – 6" clamp or weld pipe to tube ferrules or adapters, clamps and gaskets.
