

## Customer·i·sa·tion:

noun - configuration or adjustment made for the specific needs of a customer

We know it hasn't made Webster's yet. But we think it describes what we do to a tee. Triple/S Dynamics has been in the business of custom designing and manufacturing process equipment for a long time. One of a kind. Made to order. Designed with your problem in mind. Whether it is configuring a complete system or a single conveyor to fit into an existing plant layout, we're asked over and over can you make this work for us? And we do. We create solutions just for you. It may have our name on the side but it is manufactured with you in mind.

*Call us today at **1.800.527.2116**, and let us show you real customerisation.*
