

Our Feeders Are Made To Be Ignored...

Acrison®

You won't have any problems with the way they're built, because they're built to last. Which they do, for years and years with little or no maintenance. And, you won't have any problems with off-spec product, because our feeders produce the highest sustained accuracy in the business.

The accuracy of our weigh feeders is assured by our leading-edge controls technology dictating to the most durable, mechanically simple weighing systems and metering mechanisms. Our weighing systems are unsurpassed in dependability, precision and

ruggedness and they never need adjustment of any kind; they are permanently calibrated.

Choice is no problem either, because we make the most comprehensive, most versatile, best-backed line of feeders available anywhere. They give you exactly what you pay for. No problems.

We invite you to see a test in our customer demonstration facilities using your material and the specific equipment we recommend for your application. No cost or obligation. Contact Acrison today to arrange for a product evaluation.
