

NEW ARRIVAL

Clamp unions, also known as sanitary unions are heavily used worldwide in food and beverage processing plants. The process of installing, maintaining, cleaning and removing these sanitary gaskets is a critical aspect of preventing bacteria growth. Unfortunately, the design of the clamps is susceptible to human manipulation. Inconsistencies on how much a clamp is tightened results in a recess or intrusion of the gasket, relative to the ferrule and ultimately the flow path.

Trynox is proud to announce its newest product to the market **Trynox ClampSense**. This is a new revolutionary way to clamp fittings and the only place where you can get it is at Chemseal® Inc.

Be sure to check out their website to order your **FREE** sample of this revolutionary product at www.chemsealinc.net or just scan the barcode below and checkout. Only pay S&H. Use code **CLAMPSENSE** in checkout to receive up to \$40 OFF one ClampSense.
