

ADVANCED moisture control. Cool under pressure.

The DEPRAG Advanced Line of stainless steel air motors delivers superior, clean performance in any environment.

When hygiene is a must, leading companies in the food and medical industries depend on DEPRAG stainless steel sealed air motors. Unlike electric motors, in wet environments, DEPRAG stainless steel air motors operate at high torque with a fast and precise energy transfer, while withstanding harsh cleaning agents and temperatures. When advanced performance is required, DEPRAG air motors stay cool under pressure.
