

Equipment Solutions for Food Processors

Helping make food safe & affordable

Millard Manufacturing Corporation is a stainless steel fabricator specializing in custom equipment for industrial food processing plants – from simple drip pans to a complete cut floor with multiple de-boning lines. All of our equipment is protected by **Millard PassPRO™**, our in-house **passivation** process that provides maximum corrosion resistance and improves sanitation and food safety. We have more than 40 years of experience cooperatively working with our customers nationwide from small operations to large corporations to maximize yields while maintaining high **Safety & Sanitary Design Standards**.
