

Leave the material and air handling to us. It's what we do.

Schenck Process – providing custom solutions for pneumatic & mechanical conveying, filtration, weighing, feeding and odor control

PNEUMATIC CONVEYING

FILTRATION

WEIGHING

FEEDING

For over 40 years Schenck Process has provided custom bulk material and air handling solutions to some of the world's most recognized brands in food manufacturing. Their trust was built with Schenck Process as a result of repeatedly receiving fully designed safe and successful pneumatic & mechanical conveying, filtration, weighing, feeding and odor control systems.

Custom solutions in products and systems are available for the following:

- Feeders and Weighbelts
- Bulk Bag Unloaders
- Airlocks
- Process Controls
- Dilute and Dense Phase Conveying
- Vacuum Conveying
- Dust Collection
- Air Pollution

Contact us to see how we can put our proven experience in material and air handling for food processes to work for you.
