

SANITARY DRUM MOTORS

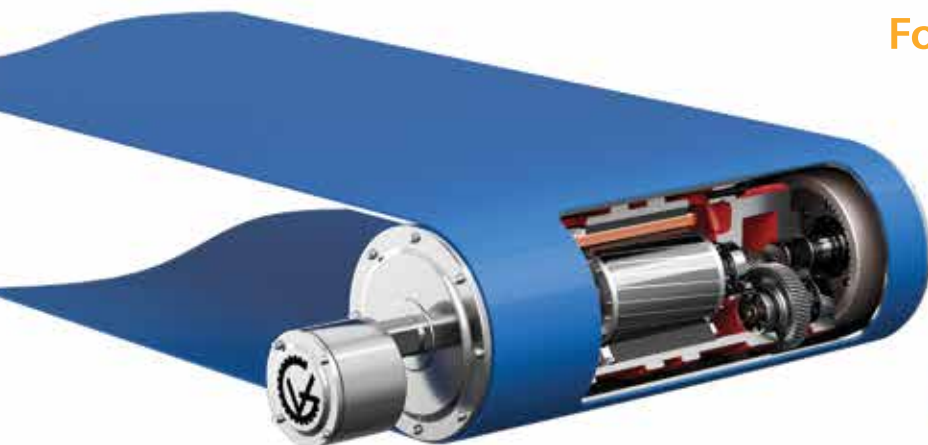

IP69K ENCLOSURE • Washdown up to 3,000 psi
NO EXTERNAL MOVING PARTS • No Maintenance
ANTIMICROBIAL DESIGN • Prevent Bacterial Harboring

The SSV Sanitary Drum Motor, **all 316 stainless Steel** construction, has a **IP69K** enclosure rating, can operate continuously while being pressure washed up to **3,000 psi**. The **energy efficient**, all enclosed design of the drum motor, has **no external moving parts**; eliminates maintenance required on conventional exposed conveyor drives and increases **operator safety**.

Designed and engineered specifically for the food industry, the **USDA approved SSV Sanitary Drum Motors** meet and exceed the highest level of sanitation requirements.
