

The Trusted Metal Conveyor Belt Manufacturer™

C-CURE EDGE® CONVEYOR BELTS

Prevent belt catching and improve safety

Wire Belt Company's patented C-Cure Edge® conveyor belts have C-shaped closed edge loops that help prevent catching during contact, installation, operation, and especially during tight conveyor transfers.

USDA Accepted C-Cure Edge® conveyor belts also add an extra layer of safety with their easy to clean-in-place design. This means no need to take the belt off the conveyor during sanitation.
