

Together,  
we can solve your  
surface sterilization  
challenges.

## Surface microbial contamination can shut down your production line.

To keep things moving, partner with XENON, the global leader in Pulsed Light technology. Our proven solutions provide fast >5 log pathogen reduction to ensure surface sterilization. Over the years, we've helped countless end-user and integrator clients develop precise solutions for their specific needs.

You know your product. We know **Pulsed Light**. Let's work together to solve your product or packaging sterilization challenges.
