

CONVEYOR BELTS

SPIRAL, TURN-CURVE & STRAIGHT RUNNING

Get The Best Performing Conveyor Belt For Your Specific Requirements

OmniGrid® 360 Weld 3/4, 1, & 1.5"-pitch

Patented, Precision Welded Steel Belts that Run Smoother, Stronger, Longer

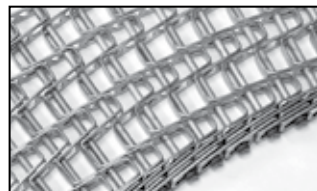

- World's only patented, lotension grid-style belt
- Patented, zero-tension, 360° buttonless welds increase load bearing capacity and eliminate cracking commonly found in traditional bridge welds
- Coining process reduces break-in wear and increases belt life
- Integral guard edges now with smooth, rounded finish

PosiDrive Spiral™

A Proven Product Orientation Solution

- Maintains product orientation
- Eliminates jam-ups and streamlines packaging
- New PosiDrive belt designed for heavier loads
- Affordable solution for new and existing spirals

LOTENSION SPIRAL FLEX BELT

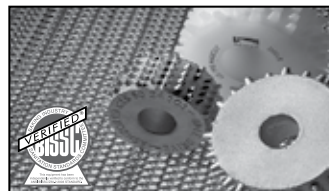

Omni-Flex® 3 x 1

Precision crafted, this strong and lightweight belt is ideal for conveying trays and large products

Omni-Flex®

The first and most widely used Ashworth belt for spirals and turn-curves since its inception in 1959

STRAIGHT RUNNING BELTS

Cleatrac®

Positive sprocket and belt engagement ensures true tracking for precise product transfer

Flat Wire

Proven reliability and easy to clean with numerous configurations for wide range of applications

Ashworth Bros., Inc. is the world's only conveyor belt manufacturer that provides both metal and plastic spiral belting along with a variety of straight running belts offering customers the best belting solutions for their specific requirements. Companies around the world depend on Ashworth's quality products, reliable service, and innovative solutions to maximize throughput and minimize life-cycle costs.
