

## NEED A SIMPLER WAY TO CUT WASTEWATER COSTS?

Lower wastewater effluent limits and rising surcharges are forcing food and beverage processors to consider new wastewater treatments. This can be a complex and daunting experience, whether you are new to wastewater treatment or trying to optimize systems like dissolved air flotation (DAF). Now there is a simpler way to help cut wastewater costs: TEQUATIC™ PLUS Filters. Compact, self-cleaning and low maintenance, TEQUATIC™ PLUS Filters are designed to efficiently operate in nasty conditions where traditional filters often fail.

Learn how one brewery anticipates \$500,000/year in potential surcharge savings with TEQUATIC PLUS Filters, and how a meat processor estimates 40%-60% savings on DAF chemicals.
