

Custom Automatic Lubrication Solutions

XACT

Oil

- Dosing options include an automatic timed interval system or XACT Sniper sensing technology.
- Allow your maintenance and production personnel to spend less time worrying about lubrication accuracy and focus on what they do best.
- Nozzle options allow for pinpoint accuracy or a thin oil film on your entire chain.

Grease

- Lubricate 4, 6, 8, or more grease points with just one easy to use system
- Slope-top enclosure limits water (and potential bacteria) buildup, perfect for food plants.
- Available in stainless steel for high washdown environments and poly/fiberglass for less aggressive environments.
- The system runs only when your machine runs, maintains optimum grease levels, and removes issues with grease being pushed out the bearing seals.

Accessible hands-free lubricators

Cost-effective hands-free grease system perfect for lubricating hard-to-reach bearing points to maintain proper lubrication.

- Available in both battery and gas powered versions.
- Reduce component failure on parts that are hard-to-reach and never receive proper lubrication.
- Proper lubrication intervals that ensure your components are getting the right amount of lubricant.
