

No One Likes a Product Recall...

Avoid product contamination *AND* increase uptime with

# Detectomer<sup>®</sup> and Tuf-Steel<sup>®</sup>

## The Latest Advancement in Effective Elastomeric Contamination Detection

Our *Detectomer*<sup>®</sup> products are a line of metal detectable and x-ray inspectable elastomeric products designed to work with any existing conveyor, pipe line or free fall detection system. *Detectomer*<sup>®</sup> products can be spotted by in-line x-ray inspection and metal detection systems as well as magnetic separators.

There is no beating the *Tuf-Steel*<sup>®</sup> family in SIP, WFI, hot oil and cryogenic applications because *Tuf-Steel*<sup>®</sup> maintains seal integrity in applications with temperatures ranging from -325°F to 550°F. With a 500 steam cycle guarantee and minimal creep and cold flow, this metal detectable gasket will easily out perform other elastomeric gaskets.
