

# Pneumatic. Electric. Hydraulic. Vacuum.

Whether it's a standard off-the-shelf cylinder or a cutting-edge custom assembly, Bimba is uniquely positioned to help with your motion control application. That means everything from simple, non-repairable products to the latest in precision mechatronics or end-of-arm tooling applications. If you've got an engineering challenge, Bimba has the solution to keep your application moving forward. From innovative design to unparalleled customer service, it's all about getting you the right solution at the right time.
