**MEET MINI, MARION'S R&D-SIZED MICROWAVE VACUUM DYNAMO.**

Take time out of transforming ideas into solutions. Innovate and iterate faster than ever before. That's the power of Mini. Sample applications include; powder drying, microbial reduction, low-temperature drying, change of state, extraction, dehydration, solvent removal and many more. It's like adding rocket fuel to your test lab. Shorter processing times. Instant power control. Eliminate burning and case hardening. No warm-up or cool-down needed. You know.... Superhero stuff.
