

ROSS SANITARY BLENDERS

ROSS. Your No.1 choice for sanitary food blending.

Ross offers the world's most extensive line of equipment for sanitary blending and vacuum drying. In the USA alone, Ross operates five plants and a test and development laboratory. Overseas, Ross sanitary equipment is now built in plants in China and India, and in a licensed manufacturing facility in Japan.

Wherever your plant may be located, Ross can provide the Ribbon Blenders, V-Blenders, Double Cone, Paddle Blenders or Vertical Cone Screw Blenders you need. Standard sizes from ¼ to more than 1000 cu.ft. BISSC certified.

Used worldwide in applications like yours.

For a multitude of applications from spices and soup concentrates to cake mixes and bagels, Ross is universally accepted for the superior quality of our equipment and worldwide support.

- Cereals
- Drink pre-mixes
- Confectionary products
- Coffee flavoring
- Energy snacks
- Potato chip coatings...

More blender choices. Faster delivery.

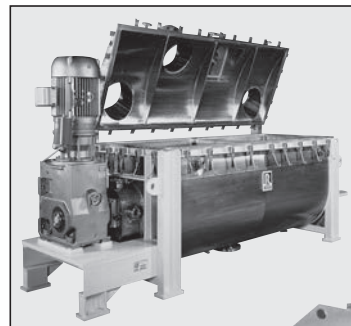

With dozens of blenders in stock, Ross can usually provide the blender you need in a matter of days. For customers who need a customized blender, we can help meet your immediate production requirements with a trial/rental blender while we build your specialty blender.

And lower Prices!

Check out our blender prices – the lowest you'll find anywhere.

The clean design and finish of a Ross Blender produces faster blending cycles, thorough discharge, and easier clean-up.

Space-saving drive designs are available, as on this 100 cu.ft., 40 HP sanitary vacuum dryer.

Vertical Cone Screw Blenders

Even in very large sizes, Ross Cone Screw Blenders operate without a lower screw-support bearing – for faster discharge and lower maintenance costs.
