## Wholesome Ingredients Matter

*Supplying Food Seasonings and Ingredients that are Essential, Intentional, and Safe.*

Since 1997, The Food Source has worked to be different and say yes when all others say no. As we've continued to grow and evolve, it's always been our priority to stay ahead of the increased awareness to food safety, labeling requirements, and trends. In order to accomplish this, we rely on the diversity of our personnel such as flavor chemistry, culinology, protein processing, meat science, food production operations, dairy commodity specialization, savory flavor development, regulatory, bench & plant scaling, global manufacturing supply chains, and GFSI & FSMA continuing education. This collective group of diverse backgrounds emboldens The Food Source to supply a total ingredient and seasoning supply partner for our customers both domestic and abroad.

### Seasonings

### Ingredients
