CLARION® FOOD GRADE BARRIER FLUIDS

FoodGrade

For a more sustainable future.

SYNBAR® FLUIDS

Clarion SynBar Fluids are formulated using premium synthetic-base fluids and additive systems to perform in mechanical seals where superior lubrication and cooling properties are a must to promote seal longevity. An enhanced additive system was designed to promote the natural properties of the polyalphaolefin base stock and to meet the special requirements for mechanical seals.

QUALITIES

- Are registered as NSF H-1 lubricants (formerly USDA H-1) for use in food processing plants under the jurisdiction of the USDA.

- Are formulated with additives and base stocks to meet incidental food contact applications and meets US FDA regulation 21 CFR 178.3570 requirements.

- Are formulated to minimize system impurities and reduce catalyst poisoning.

- Have excellent low temperature fluidity and high temperature stability to cover a wide service temperature range.

- Are compatible with commonly used seal materials.

APPLICATIONS

- Designed for use in both pressurized and non-pressurized dual mechanical seals manufactured by companies such as John Crane, and FlowServe, etc., where a superior buffer/ barrier fluid is required.

- Recommended for use in mechanical seals found in chemical/hydrocarbon processing, food processing, gas compression, and fluid pumps, etc., where a fluid with its unique properties are called for.

- Can be used in low temperature hydraulic systems as a replacement for Mil-5606 fluids in non-aviation applications.

CERTIFICATIONS

NSF H-1 – Listed in "NSF Registered Proprietary Substances and Nonfood Compounds."

These products are authorized for use under USDA Inspection and Grading Programs.
