

We design and engineer each conveyor system to create a seamlessness between belt and transport to reduce "cost of ownership" and increase food safety.

### Sanitary Belt Conveyor Systems

- Pack-Off Stations
- Bulk Filling Stations
- Servo Product Merges
- Case Handling/Merging
- Raw Product Handling
- Checkweighing and Labeling

### Product Features

- Built and Designed Above USDA and RTE Standards
- UL Approved Controls
- Designed and All Customer Approvals in 3-D
- With Friesen In-House Manufacturing, Controls, 3-D Drawings and In-House Testing - "Change Orders" are Non-Existent and Installation Time is Minimized
- All Products and Systems Fully Tested at Friesen's Before Shipment
- Individual to Complete Systems become "one working system" - Results in lower cost of ownership and increase in productivity.
- Ideal for Raw, Packaged, Cased and Combo Products
