

The Slipstick® Horizontal Motion Conveyor

from Triple/S Dynamics is based on simple design.

- No damage to fragile products.
- No seasoning or coating loss.
- No need for piggybacking for long runs.
- No segregation of product pieces.
- No bearings, gears, belts or springs anywhere near the product.
- No limitations on drive mounting locations.

Simply put, the Slipstick, the original Horizontal Motion Conveyor, sets the standard of performance, sanitation and reliability. How reliable? Customers have been moving food on Slipstick conveyors since the late 1980's. Over twenty years reliable.
