

A Complete Line of Industrial Refrigeration Products

Rotary Screw Compressors

Frick® RWF II and RXF Rotary Screw Compressors.... Leading the food and beverage industry with the most innovative and broadest product range available for industrial applications.

Frick® PowerPac™ reduces the need for field labor. Frick® compressors, heat exchangers, evaporators, and condensers come in a compact package controlled by Frick® Quantum™ HD controls.

Reduces the requirements for a Process Safety Management (PSM) program.

Process Room Control for Air Filtration, Pressurization and Humidity Control For Safe, Sanitary Food Processing

- Filtration, pressurization, condensation control, and sanitization
- Rooftop Installation
- Engineered to your specific psychrometric requirements

Air Handling and Evaporator Units

A Frick® Heavy-Duty Evaporator Means:

- Extreme low noise fan operation
- Proven "Floating Coil" design- The support structure for the evaporator tubes is indirect
- Frick/Guntner horizontally headered coils defrost quickly. Since there are no orifices, the tubes are "open-channels" and drain quickly
- "Drop down" pan arrangement simplifies cleaning

Evaporative Condensers

The ECOSS Stainless Steel Evaporative Condenser from Frick delivers a lifetime of cost savings

- Easier installation with less weight than galvanized steel
- Easy access to components for reduced maintenance hours and costs
- Exceptional resistance to white rust and corrosive elements
- Highly efficient direct-drive fan options lower energy consumption, increased reliability
- Effective life span double that of conventional evaporative condensers
- Significantly reduced annual operating costs
- Up to 70% savings in total life-cycle costs

Other Frick products include Pressure Vessels, Plate Heat Exchangers and Engineered Control Systems
