DEPRAG. What all Air Motors *aspire* to be!

Built to demanding specifications, DEPRAG Stainless Steel Air Motors can be supplied with the following features: oil-free, fully sealed, polished stainless, and they are insensitive to cleaning solvents, which is perfect for the Food Industry. Medical motors can be sterilized or autoclaved. Motors for specialized applications, such as a drainage milling-robot, are powerful and overload safe. DEPRAG's stainless steel air motors are ATEX-compliant (that includes the air motor, brake and gearing) and they are therefore ideal for the use in explosive hazardous environments. Anywhere you need first-class air motors, turn to DEPRAG!
