

Put some juice into your production!

When a high performance and overload safe drive is required, DEPRAG's stainless steel Air Motors are always ready for action. Hygienic, compact, and low maintenance so they can be easily washed, yet tough in demanding situations and resistant to cleaning agents. High speed ranges and explosion safety ensure that DEPRAG Air Motors can be used in a wide spectrum of applications. Plus, DEPRAG offers a specially designed solution for more complex applications.
