

Conveying/Processing Systems

Key ways to convey, grade and feed products for processing & packaging

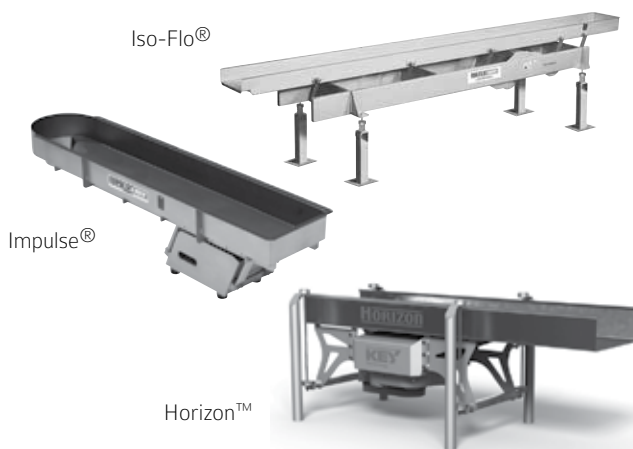

Intelligent conveyors, built for performance...

- **Collection Conveyors** – collect product with minimal damage
- **Distribution Conveyors** – provide accurate distribution of product
- **Feed Conveyors** – optimize line performance with precision feeding
- **Grading, Sizing and Separating Conveyors** – perform essential functions in your line
- **Transfer Conveyors** – elevate, decline or transport product

Also: Marathon™ long-distance conveyor • SmartArm® wireless monitors

Vibratory Conveyors

Systems to classify, transfer and remove targeted material...

- **Precision Size Grader** speeds grading for products from green beans to potato strips
- **Rotary Size Grader** removes EVM, seeds, snapped ends
- **Sliver Sizer-Remover** dejuices, deseeds, discards fines
- **Length Sizer** targets whole potatoes for specialty cuts
- **Small Piece Remover** lifts away undersized product

Rotary Sizers/Graders

Precision Size Grader

A program that delivers peace of mind...

Key stands behind our products and customers with a service focus that safeguards your sorters, shakers and processes – and the revenue they generate for you.

- **24/7 technical support & parts worldwide**
- **Three plan levels** to optimize sorter investments
- **RemoteMD™** real-time monitoring to boost uptime
- **Training programs** – online and instructor-led
- **Service Advisor** quarterly newsletter with product info, tips and advice to keep you at peak performance
