

Ross V-Blenders deliver rapid blending of free-flowing solids that can vary in bulk density and percentage of total mixture. De-lumping and de-agglomeration are fast with standard intensifier bars. Complete safety interlocks, start/stop and e-stop included.

Blending cycles are fast – typically 10 minutes or less – with **Ross Double Cone Blenders**. Standard sizes from ½ to 80 cu.ft. are available, and many are in stock for immediate delivery. Type 316 stainless with 240-grit interior polish.
