

# Dispersion Genius

The ROSS Solid/Liquid Injection Manifold (SLIM) system saves time and money on your bottom line.

Engineered to accelerate mixing in challenging applications, the SLIM instantly disperses hard-to-mix powders like xanthan gum, calcium carbonate and pectin into a liquid stream.

Directly induct powders at rates up to 700 lbs/min and cut processing times by 80% or more. By preventing the formation of agglomerates, the SLIM helps ensure the maximum yield of solids.

No pump, eductor or clogging. In-line and batch models are portable to serve multiple process lines.

Imagine the Possibilities
