Avoid product contamination *AND* increase uptime with

Detectomer® and Tuf-Steel®

Bulk Hamburger X-ray

Dry Rice X-ray

Sauerkraut X-ray

Box of Corn Muffin Mix X-ray

The Latest Advancement in Effective Elastomeric Contamination Detection

Our PATENTED *Detectomer®* products are a line of metal detectable and x-ray inspectable elastomeric products designed to work with any existing conveyor, pipe line or free fall detection system. *Detectomer®* products can be spotted by in-line x-ray inspection and metal detection systems as well as magnetic separators.

There is no beating the *Tuf-Steel®* family in SIP, WFI, hot oil and cryogenic applications because *Tuf-Steel®* maintains seal integrity in applications with temperatures ranging from -325°F to 550°F. With a 500 steam cycle guarantee and minimal creep and cold flow, this metal detectable gasket will easily out perform other elastomeric gaskets.

To learn more about these gaskets and about our newly granted *Detectomer®* Patent, please visit www.rubberfab.com/detectomer.

**We have received our X-ray Inspectable Patent!
Patent #9,701,827**
