

Reduce Wash Time. Minimize Downtime.

The all 316 stainless steel continuous profiled **SSV Sanitary** drum motor is manufactured with the belt profile machined directly onto the drum, eliminating sprockets. The antimicrobial, sprocket-free and zero-gap design eliminates trapped food by-products and areas for bacterial growth, reducing downtime and cutting cleaning time in half.

- ➔ **IP69K sealing system withstands up to 3000 psi**
- ➔ **No external moving drive components**
- ➔ **Reduce maintenance and improve safety**
