

# SSV Drum Motors

Made in USA 

- ➔ Withstands up to 3000 psi of washdown pressure.
- ➔ All 316 stainless steel belt profile machined directly onto the drum to drive modular, wire mesh and monolithic thermoplastic belt conveyors, without the use of sprockets.
- ➔ Continuous profiled drum motor does not have crevices which trap food by-products, eliminating areas for bacteria to harbor.
- ➔ Houses and seals all drive components inside the drum, reducing operating and maintenance costs.
